

PUTTING FAITH IN HEALTHCARE SHARING MINISTRIES?

4 POINTS TO CONSIDER

HCSMs offer a healthcare option, mostly for affordability. Some are good. Others exploit loopholes to commit fraud. Know before you buy.

1

HCSMs are NOT insurance

They look like health insurance, but are not. Most plans are not Affordable Care Act compliant. Don't expect coverage for pre-existing conditions, mental health or other needs. Check in advance.

2

State insurance departments may not regulate plans

If you have a coverage or claim dispute don't expect your state insurance department to help- DOIs have little authority over unlicensed insurance products.

3

HCSMs history of fraud

Some HCSMs may be legitimate, but many states have taken action against HCSMs for deceptive or fraudulent practices.

4

Verify before you buy

Be cautious, check the HCSM out fully and verify all claims about services, coverage, or payments.
